

## Discussion Questions for “Using Git – Terminal Mode”

1. Were you able to accept the test assignment, clone it, update it, commit your updates, and push those updates to the master?
2. How could the lecture video and the class web-page instructions be improved? Was there anything you found confusing or incorrect?
3. If you have used any different version management system, how does GitHub compare? What is better about GitHub, and what is better about the other version management system you used?
